Introduction

KOSEN is a unique institution of higher education in Japan, which provides the students five-year engineering education from the age 15. The National Institute of Technology (NIT) runs 51 national KOSENs as a single legal entity. NIT has approximately 50,000 students and 4,000 academic staff. KOSEN's primary mission is to foster creative and practical technical engineers. KOSEN has another important mission, which is to support the advancement of industry through research and the collaboration among industry, government, and academia.

Major activities

NIT has been building comprehensive partnership for promoting academic exchanges and joint research activities with overseas institutions. In Thailand, we have the following; King Mongkut's Institute of Technology Ladkrabang(KMITL), Thai-Nichi Institute of Technology (TNI) and the Office of The Vocational Education Commission, Ministry of Education.

In 2012, NIT opened our liaison office in the campus of KMITL. We always welcome Thai students who are interested in studying engineering fields with better learning facilities in Japan!
