### About

Since its establishment, University of East Asia (UEA) has promoted education of humanity and professional skills to better society with the goal of training international personnel with creative minds, spirit of service, and health. In order to achieve this, UEA has programs consisting of small groups from the first year so that students can study in various fields such as medicine, health, sports, education, and design and take curriculum to acquire different qualifications and licenses.

UEA has various facilities. For instance, there are library, recreation rooms, computer rooms, gymnasiums, indoor jogging fields, fitness rooms, video editing rooms, a video studio, a cafeteria, a convenience store, a baseball field, a football court, a dormitory for inbound students, and more. You can also use free Wi-Fi in the campus. Students have made their dreams of working abroad come true after graduation. UEA has a solid career counseling system that supports all students from the moment they enter the school to employment, preparing themselves to build a solid career in this global society.
