## NAIST Thailand Office

Contact address: Room 703, Chuchart Kumpoo Building, Faculty of Engineering, Kasetsart University, 50 Ngamwongwan Road, Chatuchak, Bangkok 10900, Thailand

<http://www.naist.jp/en/>

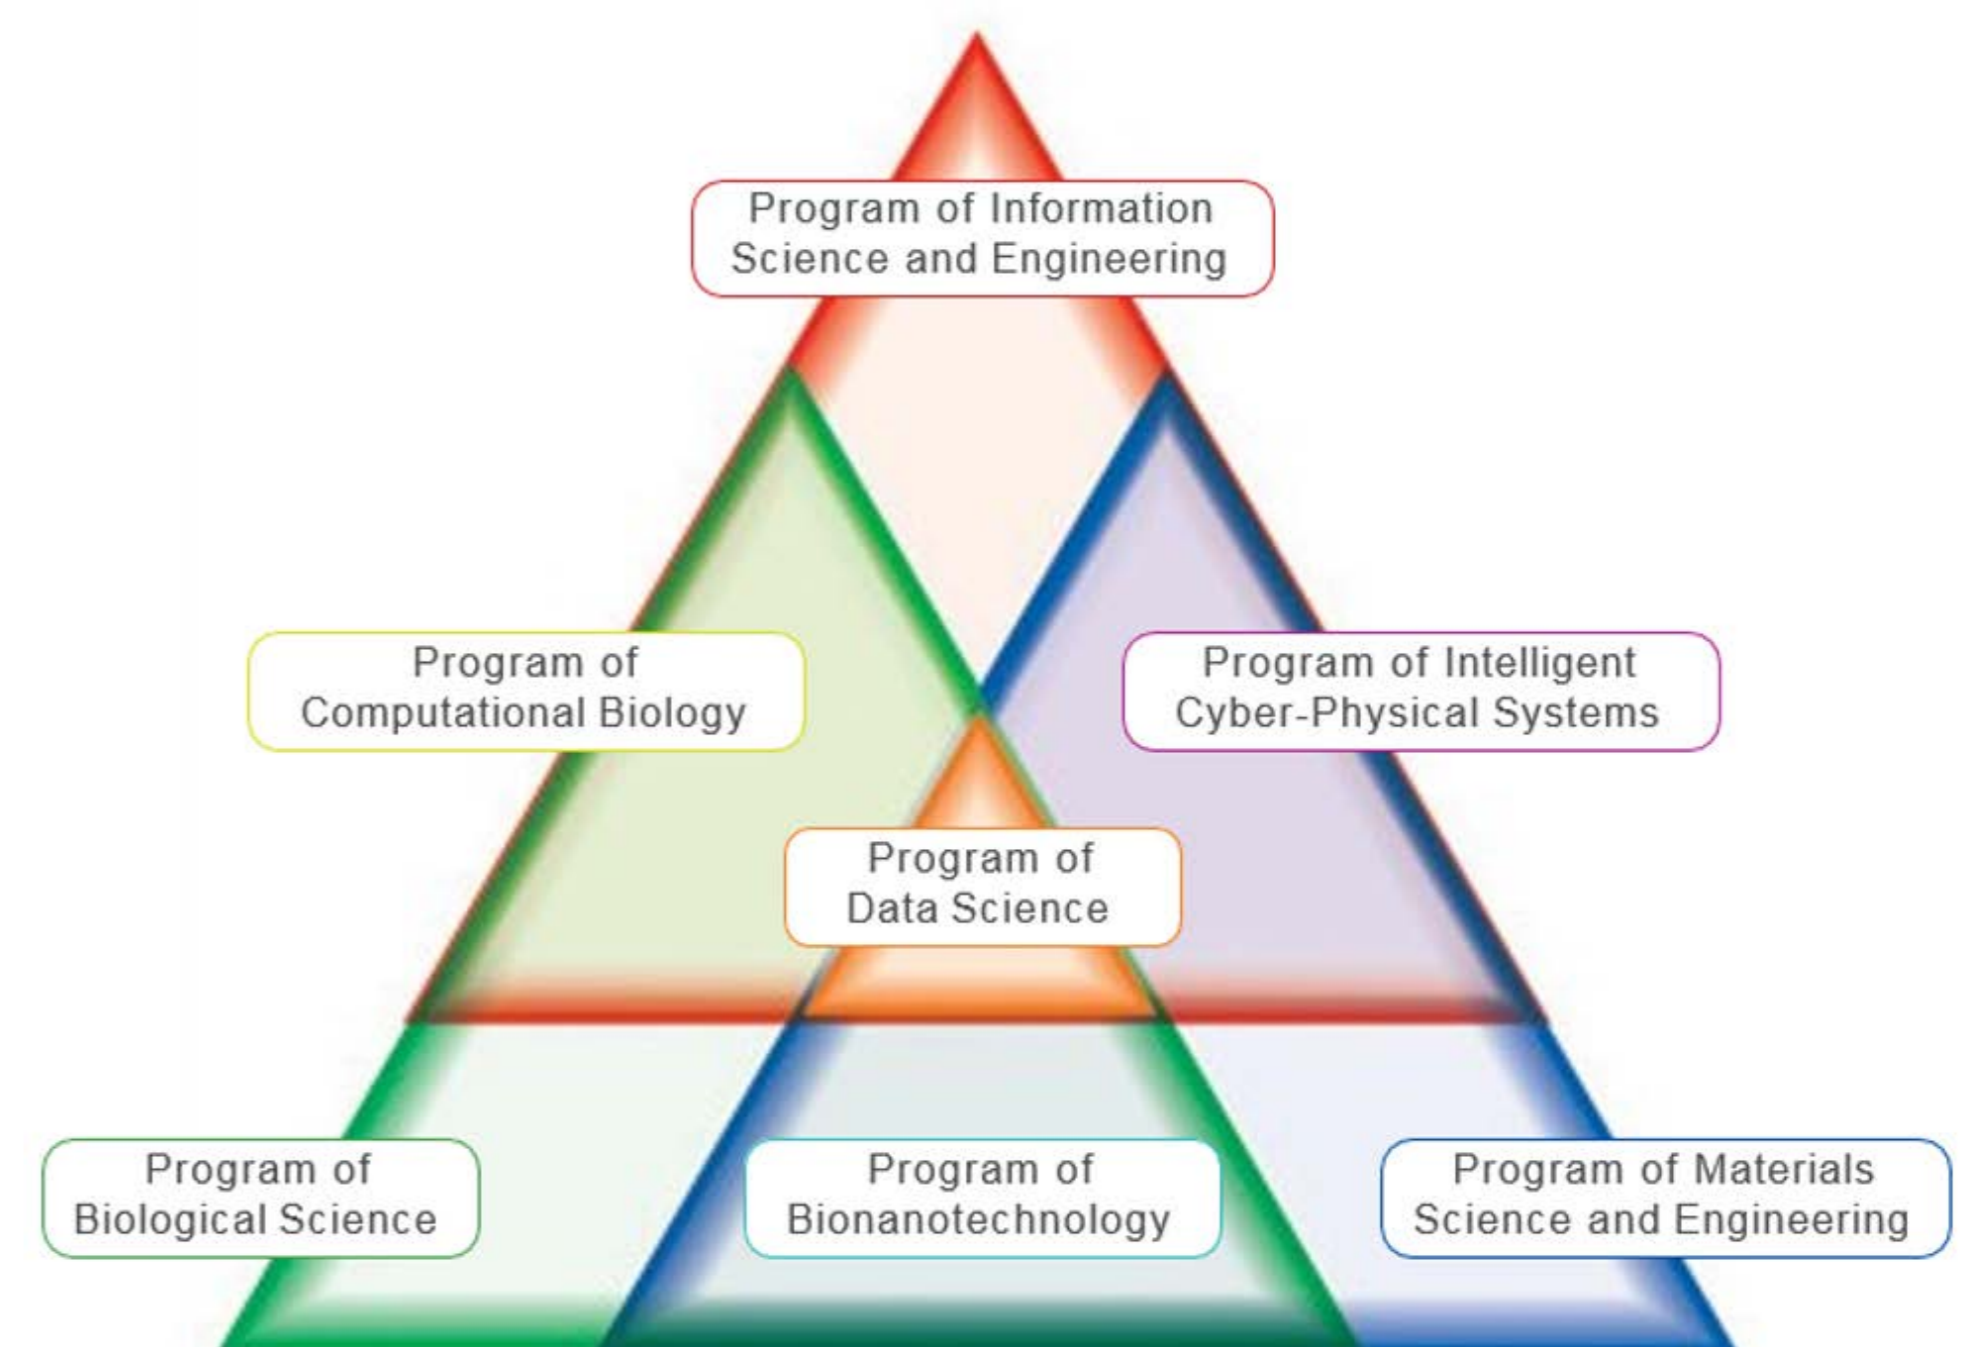

## Introduction

The frontiers of science and technology are expanding rapidly, with interdisciplinary research crossing traditional academic divisions. NAIST was established as a new graduate school national university to flexibly promote these developments in science and technology.

### ○The Graduate School of Science and Technology

NAIST has led graduate education in information, biological, and materials sciences domestically and abroad since its founding. Based on its history of research and education in these fields, NAIST undertook an organizational transformation in 2018 to remove the walls between academic fields. The Graduate School of Science and Technology was established with 7 Education Programs to holistically perform research and education in the original fields of study and in interdisciplinary areas across academic divisions. This new graduate school allows NAIST to further adapt to ever-changing societal needs and developments in science and technology.

## Major Activities

The NAIST Thailand Office has regularly held Symposia in Thailand since its 2017 opening. The “NAIST and Thai Universities for Research and Education Collaboration Symposium 2018” with Chulalongkorn University, Mahidol University and Kasetsart University was recently held. Through these symposia, NAIST Thailand Office is key as a bridge to strengthen ties between both countries through education and research, as well as between Thai universities.
